

Gallagher PIV Solution

High Security PIV

Gallagher's PIV solution is a physical access control system designed for compliance with the **Personal Identity Verification (PIV)** requirements of the FIPS 201-2 standard, offering world class security to federal agencies and their contractors.

Complete Solution

A single platform for the management of access control, alarms, and perimeter security, Gallagher's PIV solution provides:

- A simplified architecture, that enables one of the most efficient, cost effective PIV solutions for physical access control
- Hardware and software that is easy to implement, configure, and maintain
- Secure authentication and encryption between all system components
- Upgradeable device software, future-proofing Gallagher hardware for potential FIPS 201 standard changes
- Scalable system to incorporate any site's size requirement
- Quick and simple enrollment, requiring no additional software

Features

The products and software that make up the Gallagher PIV solution deliver a powerful range of features:

- Configurable periodic credential validation
- Optional support for contactless MIFARE Classic®, MIFARE Plus®, 125 kHz and MIFARE DESFire EV1® and MIFARE DESFire EV2® cards when mounted in shared federal / non-federal building entrances
- Single, dual, and triple authentication options
- Rapid PKI authentication for faster door entry
- 128-bit AES* encryption between the Controller and access readers
- Authentication of PIV, PIV-I, TWIC, CIV, and CAC credentials
- Prevent bystander PIN disclosure at the keypad with Cipher Pad functionality

PIV System Architecture

PIV Products

Gallagher PIV Software

- A Gallagher PIV Command Centre server License enables up to 16 PIV doors on a site, expandable from the 17th door onwards with the per door PIV license
- Configurable validation checks in hours, by factors (1, 2, 3, 4, 6, 8, 12, and 24) of 24 hours
- Gallagher PIV Command Centre provides ongoing OCSP or CRL validation of each PIV card's status; periodically checking the revocation status and trust path of each card's:
 - PIV Authentication Key (PAK) Certificate
 - Card Issuer Signature (CIS) Certificate
 - Card Authentication Key (CAK) certificate

PIV Cardholder Enrollment

- Enroll PIV cardholders natively in Gallagher PIV Command Centre
- No additional licensing required
- Automatic cardholder creation in Command Centre immediately following successful enrollment
- Selection of USB readers for PIV cardholder enrollment, including PIV card, PIN and fingerprint authentication options
- Optional integration to the PIVClass® Registration Engine enrollment client (separate license required)

Gallagher High Sec Controller 6000

This controller is fully compliant to the latest FIPS 201-2 standard, and is securely and periodically updated by the Command Centre Server with full details of PIV cardholder certificates and their status.

In conjunction with T-Series PIV readers, the controller is responsible for performing all PIV card authentication checks, enforcing the revocation status of PIV card certificates, and performing cardholder specific access control decisions without the need for constant server connectivity.

- Options to support daisy-chain wiring via 2 on board RS-485 ports, or home-run wiring via optional 4H / 8H Modules (4 and 8 x RS485 ports respectively)
- Can be mounted in the Gallagher Cabinet, Gallagher Dual Cabinets, Life Safety Power Cabinet, or on the Gallagher Mounting Plate (all supplied separately)
- 2 door variant also available for where 1-2 doors are required at each physical location (requires PIV Command Centre v8.10 or later).

Data Storage per Controller 6000

Max. number of access zones	Unlimited
Max. number of alarms zones	256
Max. number of access groups	2,000
Max. number of time schedules	400
Max. number of cardholders	150,000
Max. number of events	80,000
Max. number of doors	10
Max. inter-controller peer to peer connections	60

Gallagher T-Series PIV Readers

Gallagher T-Series PIV Reader's are thin, contactless/contact card readers that transfer data between PIV smart cards and the High Sec Controller 6000 via the secure HBUS protocol. Gallagher T-Series PIV readers can be configured to work with varying PIV smart card data rates and authentication modes.

- Support for real-time and secure certificate based authentication of PIV, PIV-I and CAC credentials

- All readers can be configured to support MIFARE DESFire EV1/EV2, Plus, and Classic credential technologies. Multi Technology readers also provide support for 125 kHz technology
- High grade authentication(256 bit ECC) and encryption (128-bit AES*) between the readers and Controller 6000
- Limited lifetime warranty for T10, T11, T15, and 5 year warranty for T20 and T21.

The T10 is designed for mounting on door mullions, or where a small footprint reader is desirable.

The T11 reader is designed for mounting on vertical format flush boxes, or for covering mounting holes of previous installations. Available in standard and Multi-tech variants.

Perfect for deployment in environmentally challenging locations, the T15 still fits easily in small spaces. Available in standard and Multi-tech variants.

The T20 reader is a contactless PIV card plus PIN reader, compliant to the FIPS 201-2 'PIN to PACS' specification. Available in standard and Multi-tech variants.

The T21 reader is a contact card plus PIN reader, for areas requiring multi-factor PIV card authentication. Available in standard and Multi-tech variants.

8H - 4H Reader Modules

Gallagher modules support home run wiring of other control devices, and I/O connectivity for door and equipment monitoring.

faulty connection taking down all downstream devices (as on a daisy-chained run). Each HBUS port can also support multiple HBUS devices.

Gallagher 8H and 4H modules allow HBUS devices to be home run wired back to a secure controller cabinet, removing the risk of one

Gallagher 8H and 4H modules monitor and report the state of balanced inputs, and enforce decisions to switch output relays, if required.

Gallagher Cabinets

Gallagher supplies secure enclosures for the Gallagher C6000 Controllers, and HBUS devices. Gallagher Cabinets are available in several form factors.

- Keyed lock for cabinet access
- Reversible cover
- Cable entry points on all cabinet edges
- Optical tamper protection.

LSP Cabinets

Gallagher provides LSP UL compliant cabinets in high grade steel locking enclosures. Each cabinet comes pre-installed with power supply and distribution modules, and is available in two variants:

- LSP E2 Cabinet**, 6A PSU, 8-Channel Distribution board, and a 75W Power supply board
- LSP E4 Cabinet**, 12A PSU, 2 x 8-Channel Distribution board, and a 150W Power supply board

Morpho USB Enrollment Reader

A key part of the enrollment system, the MorphoSmart 1300 Series device matches presented fingerprints against those stored on a PIV credential.

- Contact insertion and biometric reader
- Seamlessly integrated with PIV Command Centre
- Supports direct USB Connectivity
- FIPS 201 and MINEX compliant Feature Extractor and Matcher onboard.

Veridt Stealth Bio Reader

Veridt's Stealth Bio Reader integrates seamlessly with Gallagher's PIV system.

- Supports up to triple factor authentication: PIV card, PIN and Biometric
- Scheduled operation modes, aligning authentication with security threats
- Compliant with NIST SP-800 specification for authentication to access 'limited' security areas
- Optional Heavy Weather Enclosure available
