SNC-DH110T

Compact 720p/30 fps Camera - X Series

Overview

The SNC-DH110T is an indoor high definition (720p, supporting H.264 at 30fps) 1.3 Megapixel (1280 x 960 maximum resolution) vandal resistant compact minidome camera with Electronic Day/Night function, DEPA and ONVIF compliance. It supports dual streaming and triple codec encoding.

Sony's X-Series cameras have outstanding picture quality and a compact, affordable, stylish design.

Features

Compact and Stylish design
A compact, stylish and discreet design that compliments any surveillance environment.

DEPA
The SNC-DH110T offers intelligent video analytics, based on the Sony DEPA platform. DEPA is a combined function of the intelligence built in to the camera and rules/filters that determine which images should be recorded or when an alarm should be triggered.

EXMOR® and CMOS® Sensor
High resolution CMOS® sensor with low noise characteristics for improved image acquisition. Derived

from Sony's broadcast product range, EXMOR® is one of the highest quality image sensors available.

Power over Ethernet (PoE) capability

Supporting Power over Ethernet (PoE), the camera can be powered using the same Ethernet cable it uses for data transfer. This feature greatly reduces the physical infrastructure costs and speed of deployment.

ONVIF (Open Network Video Interface Forum) compliance

The ONVIF (Open Network Video Interface Forum) defines a common protocol for the exchange of information between network video devices including automatic device discovery and video streaming. Allows interoperability between network video devices.

HD (720p) resolution

Detailed 720p HD progressive images. Progressive acquisition (as opposed to interlace) means that images are more stable to view, contain more information and compress more efficiently - without "interlace artefacts".

Supports multiple industry standard codecs: H264, MPEG-4 and JPEG with dual streaming capability

This multi-codec camera supports three compression formats: JPEG, the best choice of high-quality still images

Stream Squared Function

An incredibly useful function that allows simultaneous streaming of two 4:3 aspect ratio videos in user-selectable SD resolutions. You can select the entire image or a portion of the image from the original view and resize to SD resolution. With this feature the SNC-DH110T can replace two SD cameras installed in the same line of view.

Electronic Day/Night

Ensures that the camera is operating with the optimum sensitivity for both day and night conditions.

Analogue Monitor Output
This allows an analogue video monitor to be connected directly to the camera.
